

FEATURED PROPERTY

Premium Rail Site

This premium rail-served site includes an approximately 2,177 ft. rail spur, with the potential to extend the spur an additional 1,300 feet if needed. A 200'x15' concrete dock rounds out this 20-40 acre site.

The rail is part of an extensive system in place at Great Plains Industrial Park that includes a looped system with 27 miles of total rail and other rail-served land opportunities, with a switch in place off Union Pacific's mainline.

Short or long-term leases are available on a variety of other structures.
