Example of retrofitted structure in NY

Secure Data Storage

Designed and built by the United States Army, Great Plains Industrial Park offers 95 reinforced concrete magazines with 2' earth cover, constructed in 1941. Securely fenced inside a 14,000 acre, additionally secured industrial park, these structures offer an ideal location for a data center. Two sizes offer 1,220 sq. ft. and 1,813 sq. ft. Due to earth berming, structures maintain a fairly constant temperature, providing energy efficiency.

Short or long-term leases are available on these and a variety of other structures.
