<b>Introduction and Sources</b>	Statewide	Counties	Local Areas	Metropolitan Statistical Areas	Balance of State	Projection Regions	Top Employment	Top Wages
---------------------------------	-----------	----------	-------------	--------------------------------	------------------	--------------------	----------------	-----------

## Kansas Wage Survey Tableau: 2018 Edition

This visualization contains six sections based on region. In each section you will see a map of the region divisions, a bar chart of the top median salary occupations for the selected region, and a way to select a detailed occupation to see the wage survey results in that region. You can also view results in either hourly or annual wages.

The last two sections display top employment and top wages. Each section has a map of all counties in Kansas, color coded to display the top counties by employment count or mean hourly wages (Total, All Occupations). There is also a bar chart, sorted to display top occupations by employment or wages (statewide), and color coded by occupational group.

Hover over any data points for summarized information.

If a detailed occupation does not display a value (either number of employees or wage amounts) that means the data is not available.
